Abraham Nordby

Oct 8, 2026 · @Abraham

Senior Software Developer — AI & Machine Vision · Sample City, Norway · +47 000 00 000 · abraham.nordby@example.com · abrahamnordby.example · github.com/example-user

Senior software developer with 15+ years across IT security, data science and software engineering. Production experience in backend (.NET / C#, Spring Boot), frontend (Angular) and mobile (Kotlin, Swift), specialising in applied machine learning and computer vision. This is a fictional sample CV for tutorial use.

Experience

Senior Software Developer — AI Engineer · Fjordvision Technologies AS · Dec 2024 – Present

- Design, train and deploy machine vision models for real-time analysis and industrial automation; optimise for edge and cloud.
- Integrate machine-vision systems with backend services for smooth data flow and analysis.
- Build REST APIs with Spring Boot (Java / Kotlin) and maintain a scalable microservice architecture.
- Develop native mobile apps (Android in Kotlin, iOS in Swift) connected to backend APIs and vision systems.
- Set up QA environments, support CI/CD, and write unit and integration tests with full documentation.

Machine vision · TensorFlow · Deep learning · Spring Boot · Kotlin · Swift · Docker

Full-Stack Software Engineer · Northwave Drilling Systems · Jun 2022 – Dec 2024

- Built APIs in REST and gRPC, including real-time services with SignalR in C#.
- Designed, developed and maintained full platforms with databases and microservices.
- Developed Angular and Angular Material frontends, from layout design to implementation.
- Wrote technical documentation and deployed software to customers.

C# · ASP.NET Core · SignalR · gRPC · Microservices · Angular · TypeScript · SQL

Teaching Assistant — AI Master's Programme · Nordic University of Applied Sciences · Jan – Jun 2021

- Taught hands-on implementation of machine learning algorithms to master's students.

Freelance Data Scientist · Self-employed · Jun 2016 – Jun 2020

- Analysed large datasets to inform strategic decisions for clients across several industries.
- Scoped analytical problems with clients and delivered customised solutions and recommendations.
- Owned the full pipeline: collection, cleaning, modelling, analysis and reporting.

Python · Pandas · NumPy · Scikit-learn · Statistical analysis · Data visualisation

IT Specialist · Public Sector Organisation · Jun 2005 – Jun 2016

- Ran, maintained and secured the organisation's IT infrastructure, with a focus on defending against cyber attacks.
- Provided technical support, troubleshooting and system maintenance.
- Received multiple performance awards and certificates of honour.

Core stack

Area	Technologies
Languages	C#, Python, Kotlin, Swift, TypeScript, JavaScript, C++, SQL
AI & machine learning	TensorFlow, deep learning, CNN, computer vision, OpenCV, NLP, LLMs, speech recognition, text-to-speech, scikit-learn
Backend	ASP.NET Core, Web API, Spring Boot, Entity Framework, SignalR, gRPC, REST, microservices, Flask
Frontend & mobile	Angular, HTML / CSS / SASS, Bootstrap, Android (Kotlin), iOS (Swift), Kotlin Multiplatform

Area	Technologies
Data & analytics	Pandas, NumPy, Matplotlib, Power BI, PySpark, Databricks, statistical analysis
Databases	SQL Server, Azure SQL, MySQL, NoSQL
Cloud & DevOps	Azure, Docker, Kubernetes, Linux, Git / GitHub, CI/CD, Jira

Products built and shipped

SpeakLoop — iOS, Android and web

Founder and sole developer. A real-time language learning and speaking platform with speech recognition, text-to-speech and LLM-generated exercises, built as a web platform and native mobile apps.

BrainBloom — Google Play

Creator and developer. An educational Android game with 20+ mini-games across maths, science and logic, with offline play and an animated card interface. Built in Kotlin.

ShelfSwap — web platform

Founder and developer. A book-exchange platform connecting local readers, covering full-stack development, product management and delivery.

Selected project work

- **Restaurant ordering platform:** C# / ASP.NET Web API, Angular, SQL.
- **Exam preparation platform:** Azure SQL, ASP.NET Web API, Angular, with LLM-based question handling and feedback.
- **Machine vision work:** real-time image analysis with CNNs and TensorFlow, optimised for edge deployment.

Education and certifications

- **BSc, Computer Engineering** · Nordic University of Applied Sciences · 2020 – 2022

- **MSc, Public Administration** · Sample City University · 2012 – 2016
- **BSc, Security Sciences** · Sample National Academy · 2001 – 2005
- Deep Learning Specialization (Coursera)
- TensorFlow Developer Specialization (Coursera)
- IBM Applied Data Science Specialization
- AZ-900 Microsoft Azure Fundamentals
- Kotlin Multiplatform Masterclass (Udemy)
